PRODUCT DESCRIPTION

Water based and silicon free refinishing polish used to permanently remove holograms, light dullness, swirls and polishing marks, as well as sand scratches P4000 and finer, while delivering first-class gloss.

The specific formula of PAICAR 03 includes nano-abrasive particles combined with high performance polishing agents, as well as special lubricants which make the polishing process easier and smoother. The main purpose of PAICAR 03 is being used on dark coloured surfaces, after either PAICAR 01 or PAICAR 02 to enhance gloss level and remove any residual polishing marks.

PAICAR 03 has been developed to give its best in combination with a rotor-bital polishing machine and DA-03 blue medium-soft foam pad.

TIPS

- ▶ Clean surface thoroughly before polishing
- ▶ Shake well before use
- ▶ Apply a small amount of compound
- ▶ Polish with crossed movements: left to right, up and down
- ▶ Use rotorbital polisher for better finish
- ▶ Use DA-03 Blue medium-soft polishing pad
- ▶ Keep the polishing pad clean to speed up polishing process and maximise pad life
- ▶ Apply low pressure and let the compound works on its own
- ▶ Use a clean Silky Tech microfiber to wipe off without too much pressure

HOW TO USE

Apply a small quantity of PAICAR 03 on DA-03 blue foam pad and use the pad for spreading the compound on the surface. Select a rotorbital polisher and start at low RPM, then gradually increase revolutions and polish with crossed movements, namely left to right, up and down. Wipe the surface with a clean Silky Tech microfiber cloth, in order to remove any potential residue.
